

11+ MATHEMATICS PAPER - SAMPLE -

TIME ALLOWED:	ONE HOUR						
	All working must be clearly shown and must be set out in the space provided. Attempt as many questions as you can, in any order.						
	Calculators may not be used.						
	Marks for each question are shown.						
EQUIPMENT REQUIRED:	Ruler, pencil, pen, protractor						
Name:							
Result:							
Comment:							

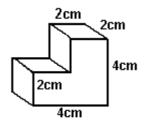

1. Find the value	of	
(a) 289 + 134		(b) 4716 - 1825
Answer	[1]	Answer
(c) 35 x 29		(d) 52.7 + 8.54 - 5.3
Answer	[1]	Answer
Work out (a)	571 x 100	Answer
(b) 3.61 x 10	Answer
(c) 27÷ 1000	

3.	Angela caught a train at 7.30 in the morning and arrived at Newcastle at 1.42 in the afternoon. How long did her journey take?

Answer								[1]	
								-	-	

4. (a) Find the volume of a cuboid with length 8 cm, width 5 cm and height 6 cm.

(b) Find the volume of this shape.

-

5.

ENTRY 20p		Side Shows 30p a go
246	Cream Teas £2.60 each	

Cream Teas £2.60 each
(a) Mary goes to the school fair.
She pays to get in. She visits 3 side shows and she has a cream tea.
How much does Mary spend altogether?
Answer [2]
(b) Anna has £5 to spend at the school fair. She must pay to get in.
How many times can she visit a side show if she has a cream tea as well?
Answer

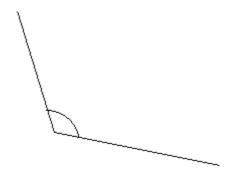

6.

Accurately measure the angles below with a protractor

7. Find
$$\frac{2}{5}$$
 of 30

8. Work out 694 x 27. Show all your working.

Answer[2]

9.	What percentage of this shape is shaded? Answer[1]
10.	Find the perimeter of this rectangle: 4.65m 1.8m
	A nswer[1]
11. F	Find the missing angles by calculation. The diagrams are not to scale: (a) (b) (c) (a) (b) (c) (d) (d) (d) (d) (d) (e) (d) (e) (d) (e) (f) (f

[3]

Answer(a) (b) (c)

12. Th	nis is a drawing of a boy in his bedroom.
\	
	(a) Estimate the length of the real bed.
	Answer: The bed is roughly[1]
	(b) Estimate the length of the real room.
	Answer: The room is roughly[1]
13.	Write down the fifth term of this sequence.
	6,9,12,15,
	Answer[1]

14.	An ora	ange drink is made by mixing water w	rith concentrated orange juice.						
	$\frac{3}{4}$ of	the orange drink is water.							
	How r	many litres of water will be in 12 litres	of orange drink?						
			Answer [2]						
15.	Look	at the numbers in the cloud:							
		20 3	17 14						
		27	12 8 35						
	Write down any of these numbers which are:								
	(a)	even	Answer[1]						
	(b)	multiples of 5	Answer[1]						
	(c)	factors of 24	Answer[1]						

(d)

prime numbers?

16.	Here is	s part of	a railway	timetable
-----	---------	-----------	-----------	-----------

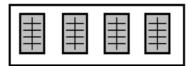

17.

			Answer .			[2]
Pupils estimate their heigh	ts as					
5m 120	cm	50mm		8 feet		
Which of these do you thin	k might be	correct?				
			Ansv	ver		[1]

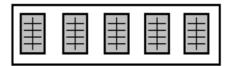

(a) Nine people sit at one table. They share the chocolate equally .	
What fraction of a bar do they each have?	Answer[1
(b) Four people sit at another table. They share the chocolate equally .	
What fraction of a bar do they each have?	Answer [1]

18. There are 3 tables in a room. There are 3 bars of chocolate on each table.

(c) In another room there are two tables. There are **four** bars of chocolate on one table.

There are five on the other.

Twelve people sit at the table with four bars.

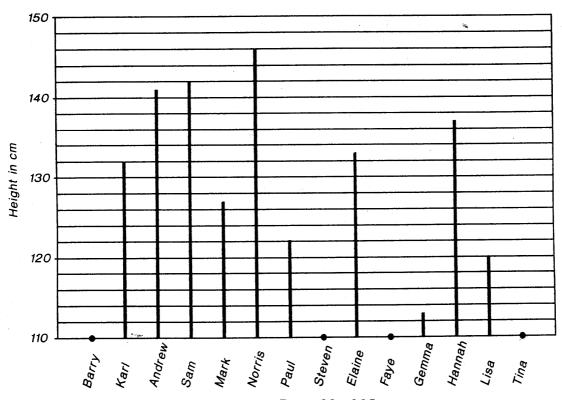

Some other people sit at the table with five bars.

At each table they share the chocolate equally. Everyone in the room has the same fraction of a bar.

How many people sit at the table with five bars? Show your working.

Answer	[2]
--------	-----

- **19.** Pembury Youth centre held a Judo club on Tuesday evenings. At the beginning of the year the children's heights were recorded on a chart. (The last 6 names are the girls names.) Complete the chart for the four missing children using the information below.
 - 1. Tina is the same height as Mark.
 - 2. Faye is 20cm shorter than the tallest boy.
 - 3. If Barry grew another 1 cm he would be the same height as the tallest girl.
 - 4. Steven is 20cm taller than the shortest boy.

Page 11 of 15

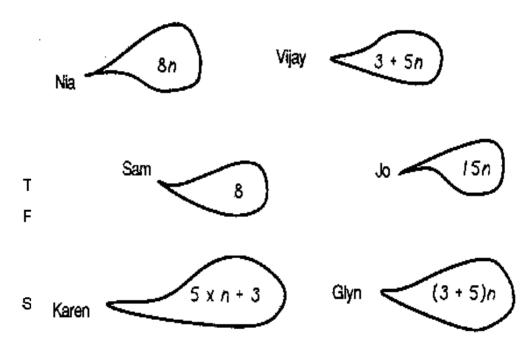

(a) What is the	difference in height between the shortest	member of the club and the tallest member?	
		Answer	. [1]
(b) Calculate t	he average height of the girls.		
		Answer	. [1]
(c) Which girl i	is closest to the girls' average height?		
		Answer	. [1]
(d) How tall is	the shortest boy?		
		Answer	. [1]

Now answer the following questions.

A teacher has 5 bags of marbles and 3 extra marbles. Each bag has in marbles inside.

Sheasks: 'How many marbles are there altogether?'

The pupils say:

There are 88 marbles altogether.

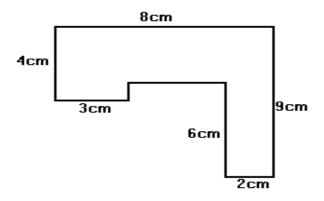

Fill in one pupil's right answer to help you complete the equation.

..... = 88

Solve the equation to find n, the the number of marbles in a bag.

Answer [2]

21.		party we ordered 4 saus s at 20 pence each.	sage ro	lls at 24	1 pence	each,	5 hoto	logs at 81p	each and 7
	What is	the total cost ?							
						Answ	er		[1]
22.	A numb	er of shapes have bee	n made	with m	atches				
	For this	pattern:							
	(a)	Draw the next 2 shapes							[2]
	(b)	Complete the table below	, to show	how ma	ny matc	hes the	re are		
		Number of squares Number of matches	4	3	5	6	7	20	
	(c)	Write down in words the re			e shape	to the n	ext.	(2)	[4]

(a) Find the area of this shape.

Answer [2

(b) Find the perimeter of the shape.

24. My calculator is broken. The only buttons that work are these.

Which sequence of buttons will enable me to get an answer of 11 on the screen of my calculator?

Answer	Γ·	2
Answer	l.	.5
		т.

If you have time, try to find some more ways to get 11.

[Total 65]
